TECHNICAL SPECIFICATIONS

Material	ABS + PP
Color	Black / White
Column Size	24 × 24 in
Dimensions	23.6 × 23.6 in
Type	Adjustable / Modular
System	Interlocking
Reuse Cycles	200+

PRODUCT OVERVIEW

The 24×24 Adjustable Plastic Column Formwork System provides a reliable and reusable solution for forming standard square concrete columns. Its symmetrical 24×24 format is the most common column dimension in residential and commercial construction, and the modular design enables fast assembly, precise forming, and easy stripping after each pour.

OPTIONS & CUSTOMIZATION

- **Color:** Black or White
- **Height:** Adjustable — standard height sections
- **System:** Compatible with standard column clamps

KEY FEATURES

SQUARE COLUMN FORMAT

Standard 24×24 in — the most common column dimension in construction.

ABS + PP CONSTRUCTION

High-strength lightweight materials for precise and durable column forming.

SMOOTH CONCRETE FINISH

Leaves a clean smooth surface — reduces post-pour finishing requirements.

200+ REUSE CYCLES

Easy to strip and reuse — significant project cost savings over many pours.
